Seminar/Workshop Information

Seminar/Workshop Title: Augmented Reality

Speaker: Mr. Jordan Deja

Date: April 14 2023

Time: 4:00 PM

Terminologies

AR - Augmented Reality

VR - Virtual Reality

Significance of the Seminar/Workshop

The Significance of the seminar/workshop is how AR change the world on how we see it. Also, we learn the benefits and things that could benefit us when using AR and understand what will be the possible technology that will be present in the future.

Materials

Laptop, Osbot, MS Teams

Software

Visual Studio, Unity

Learnings from the Seminar/Workshop

I learn from the Seminar/Workshop is that using AR could be one benefit in our daily life. Also, that during the early days of AR the market for it is very small and most people disregard AR and only a small amount of consumer both and sell AR but compared to now AR is everywhere and everyone wants one. The demand for AR is very high today compared to the past years. I learn during the seminar/workshop that the first computer that has a factional screen and UI uses AR and proving that AR has been long with us. In the session AR is said that it has many uses such as helping pilots train without doing with real planes conducting simulations for testing, designing and building projects and helping to develop apps that could benefit user in their daily life. I also learn that AR IT specialist is a good job since AR is very in demand today and tech companies needs AR specialist to make and develop AR since AR technology is starting to become a trend as technology grows at days passed by.
